DETAILED ACTION

Claims 1, 3, 7- 25, 29-42 and 44-58 have been examined.

Claims 2, 4-6, 26-28 and 43 have been canceled.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 3, 7- 25, 29-42 and 44-58 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to a signal directly or indirectly by claiming a medium and the Specification recites evidence where the computer readable medium is define as a “wave” (such as a carrier wave, signal(s)). In that event, the claims are directed to a form of energy which at present the office feels does not fall into a category of invention.

In the Specification, pages 12, 14and 15 have carrier and signal as forms of a computer readable medium. Figure 1 shows them as being outside the computer. Current Office policy does not consider the embodiment to be tangible. References to non tangible embodiments must be deleted from the Specification.
